TOXICOLOGY

SUBJECT INDEX

Volume 57 (1989)

N-Acetylaminopyrene, 1-aminopyrene, induction, monooxygenase system, 15
1-Aminopyrene, *N*-acetylaminopyrene, induction, monooxygenase system, 15
Anthraquinones, toxicity, carcinogenicity, review 227
Aroclor 1254, polychlorinated biphenyl, bone morphometry, calcium metabolism, nephrotoxicity, 83
Asbestos, lung alveolar cells, lung wall cells, lysosomal enzymes, collagen, 1
Autoradiography, manganese retention and distribution, mouse brain, gamma counting, 315
Autoxidation, *p*-phenylenediamine and *N*-methyl derivatives, muscle necrosis, free-radicals, 303

B6C3F$_1$ mice, n-hexane, neurotoxicity, 163
Benzidine, colon, intestine, nuclear anomalies, bile, 217
Bile, benzidine, colon, intestine, nuclear anomalies, 217
Bleomycin, cyclophosphamide, lung, pulmonary fibrosis, butylated hydroxytoluene, 69
Bone morphometry, polychlorinated biphenyl, aroclor 1254, calcium metabolism, nephrotoxicity, 83
Bronchoalveolar lavage fluid, nickel, pulmonary toxicity, 255
Butylated hydroxytoluene, bleomycin, cyclophosphamide, lung, pulmonary fibrosis, 69

Calcium, hepatocyte, toxicity, vanadate, 29
Calcium metabolism, polychlorinated biphenyl, aroclor 1254, bone morphometry, nephrotoxicity, 83
Carbendazim, methyl 2-benzimidazole carbamate, fungicide, reproductive system, pituitary, hypothalamus, hormones, 173
Carcinogenicity, toxicity, anthraquinones, review 227
Cephaloridine, streptozotocin, diabetes mellitus, nephrotoxicity, Fischer 344 rats, 193
Cholinesterase, organophosphorus toxicity, Soman, inhibition, 241
Collagen, asbestos, lung alveolar cells, lung wall cells, lysosomal enzymes, 1
Colon, benzidine, intestine, nuclear anomalies, bile, 217
Cyclophosphamide, bleomycin, lung, pulmonary fibrosis, butylated hydroxytoluene, 69

5-aza-2′-Deoxycytidine, hematopoietic toxicity, mice, dog, 329
Diabetes mellitus, streptozotocin, cephaloridine, nephrotoxicity, Fischer 344 rats, 193
2,4-Dimethylaniline, 2,6-dimethylaniline, xylidines, hepatotoxicity, species variation, 45
2,6-Dimethylaniline, 2,4-dimethylaniline, xylidines, hepatotoxicity, species variation, 45
Dipropylene glycol monomethyl ether, ethylene glycol monomethyl ether, testis, semini- ferous, tubule, 209
Dog, 5-aza-2′-Deoxycytidine, hematopoietic toxicity, mice, 329

Enzyme leakage, hepatotoxicity, flavonoids, primary culture, liver cells, 267
Epatocyte, calcium, toxicity, vanadate, 29
Ethylene glycol monomethyl ether, dipropylene glycol monomethyl ether, testis, seminiferous, tubule, 209

Fischer 344 rats, streptozotocin, diabetes mellitus, cephaloridine, nephrotoxicity, 193
Flavonoids, hepatotoxicity, primary culture, enzyme leakage, liver cells, 267
Free-radicals, *p*-phenylenediamine and *N*-methyl derivatives, muscle necrosis, autoxidation, 303

Fungicide, methyl 2-benzimidazole carbamate, carbendazim, reproductive system, pituitary, hypothalamus, hormones, 173

Gamma counting, manganese retention and distribution, mouse brain, autoradiography, 315
Glutathione-*S*-transferase manganese chloride, Parkinson's disease, 1-methyl-4-phenyl-1,2, 3,6-tetrahydropyridine, 183
Glutathione depression, morphine, naltrexone antagonism, morphine-tolerant mice, 287

Hematopoietic toxicity, 5-aza-2′-deoxycytidine, mice, dog, 329
Hepatocyte, calcium, toxicity, vandate, 29
Hepatotoxicity, 2,4-dimethylaniline, 2,6-dimethylaniline, xylidines, species variation, 45
Hepatotoxicity, flavonoids, primary culture, enzyme leakage, liver cells, 267
n-Hexane, neurotoxicity, B6C3F$_1$ mice, 163
Hormones, methyl 2-benzimidazole carbamate, carbendazim, fungicide, reproductive system, pituitary, hypothalamus, 173
Hypothalamus, methyl 2-benzimidazole carbamate, carbendazim, fungicide, reproductive system, pituitary, hormones, 173

Immunotoxicity, rat, organotin, tributyltin oxide, 97
Induction, 1-aminopyrene, *N*-acetylaminopyrene, monooxygenase system, 15
Inhibition, organophosphorus toxicity, Soman, cholinesterase, 241
Intestine, benzidine, colon, nuclear anomalies, bile, 217

Liver cells, hepatotoxicity, flavonoids, primary culture, enzyme leakage, 267
Lung, bleomycin, cyclophosphamide, pulmonary fibrosis, butylated hydroxytoluene, 69
Lung alveolar cells, asbestos, lung wall cells, lysosomal enzymes, collagen, 1
Lung wall cells, asbestos, lung alveolar cells, lysosomal enzymes, collagen, 1
Lysosomal enzymes, asbestos, lung alveolar cells, lung wall cells, collagen, 1

Manganese chloride, glutathione-*S*-transferase Parkinson's disease, 1-methyl-4-phenyl-1,2, 3,6-tetrahydropyridine, 183
Manganese retention and distribution, mouse brain, gamma counting, autoradiography, 315
Metabolism, nitrosaminophosphates, phosphatase activity, 59
1-Methyl-4-phenyl-1,2,3,6-tetrahydropyridine, glutathione-*S*-transferase manganese chloride, Parkinson's disease, 183
Methyl 2-benzimidazole carbamate, carbendazim, fungicide, reproductive system, pituitary, hypothalamus, hormones, 173
Mice, 5-aza-2′-deoxycytidine, hematopoietic toxicity, dog, 329
Monooxygenase system, 1-aminopyrene, *N*-acetylaminopyrene, induction, 15
Morphine, glutathione depression, naltrexone antagonism, morphine-tolerant mice, 287
Morphine-tolerant mice, glutathione depression, morphine, naltrexone antagonism, 287
Mouse brain, manganese retention and distribution, gamma counting, autoradiography, 315
Muscle necrosis, *p*-phenylenediamine and *N*-methyl derivatives, autoxidation, free-radicals, 303

Naltrexone antagonism, glutathione depression, morphine, morphine-tolerant mice, 287
Nephrotoxicity, polychlorinated biphenyl, aroclor 1254, bone morphometry, calcium metabolism, 83
Nephrotoxicity, streptozotocin, diabetes mellitus, cephaloridine, Fischer 344 rats, 193
Neurotoxicity, *n*-hexane, B6C3F$_1$ mice, 163
Nickel, pulmonary toxicity, bronchoalveolar lavage fluid, 255
Nitrosaminophosphates, metabolism, phosphatase activity, 59
Nuclear anomalies, benzidine, colon, intestine, bile, 217

Organophosphorus toxicity, Soman, cholinesterase, inhibition, 241
Organotin, immunotoxicity, rat, tributyltin oxide, 97

Parkinson's disease, glutathione-*S*-transferase manganese chloride, 1-methyl-4-phenyl-1,2, 3,6-tetrahydropyridine, 183
p-Phenylenediamine and *N*-methyl derivatives, muscle necrosis, autoxidation, free-radicals, 303
Phosphatase activity, nitrosaminophosphates, metabolism, 59
Pituitary, methyl 2-benzimidazole carbamate, carbendazim, fungicide, reproductive system, hypothalamus, hormones, 173

Polychlorinated biphenyl, aroclor 1254, bone morphometry, calcium metabolism, nephrotoxicity, 83
Pregnancy, vitamin A, toxicology, retinoids, teratogenicity, 117
Primary culture, hepatotoxicity, flavonoids, enzyme leakage, liver cells, 267
Pulmonary fibrosis, bleomycin, cyclophosphamide, lung, butylated hydroxytoluene, 89
Pulmonary toxicity, nickel, bronchoalveolar lavage fluid, 255

Rat, immunotoxicity, organotin, tributyltin oxide, 97
Reproductive system, methyl 2-benzimidazole carbamate, carbendazim, fungicide, pituitary, hypothalamus, hormones, 173
Retinoids, vitamin A, toxicology, teratogenicity, pregnancy, 117
Review toxicity, carcinogenicity, anthraquinones, 227

Seminiferous, dipropylene glycol monomethyl ether, ethylene glycol monomethyl ether, testis, tubule, 209
Soman, organophosphorus toxicity, cholinesterase, inhibition, 241
Species variation, 2,4-dimethylaniline, 2,6-dimethylaniline, xylidines, hepatotoxicity, 45
Streptozotocin, diabetes mellitus, cephaloridine, nephrotoxicity, Fischer 344 rats, 193

Teratogenicity, vitamin A, toxicology, retinoids, pregnancy, 117
Testis, dipropylene glycol monomethyl ether, ethylene glycol monomethyl ether, seminiferous, tubule, 209
Toxicity, carcinogenicity, anthraquinones, review 227
Toxicity, hepatocyte, calcium, vanadate, 29
Toxicology, vitamin A, retinoids, teratogenicity, pregnancy, 117
Tributyltin oxide, immunotoxicity, rat, organotin, 97
Tubule, dipropylene glycol monomethyl ether, ethylene glycol monomethyl ether, testis, seminiferous, 209

Vanadate, hepatocyte, calcium, toxicity, 29
Vitamin A, toxicology, retinoids, teratogenicity, pregnancy, 117

Xylidines, 2,4-dimethylaniline, dimethylaniline, hepatotoxicity, species variation, 45

Toxicology, 57 (1989) 347–348
Elsevier Scientific Publishers Ireland Ltd.

TOXICOLOGY

VOLUME CONTENTS

Volume 57 (1989)

Lung cell reactions in guinea pigs after inhalation of asbestos (amosite) (**Chronic exposure to amosite leads to cellular reactions in the lung**)
by M. Sjöstrand, R. Rylander and R. Bergström (Gothenburg, Sweden) 1–14

Characterization of the induction of rat hepatic microsomal drug-metabolizing enzymes by 1-nitropyrene metabolites, 1-aminopyrene and *N*-acetylaminopyrene (**These aromatic hydrocarbons induce cytochrome *P*-450 isoenzymes similar to those after 3-methylcholanthrene**)
by M.A. Belisario. R. Pecce, F. Scopacasa, A.R. Arena and N. Staiano (Napoli, Italy) 15–27

On the role of mitochondria in cell injury caused by vanadate-induced Ca^{2+} overload (**Mitochondrial function is important for the Ca^{2+} modifying effects of vanadate**)
by P. Richelmi, F. Mirabelli, A. Salis, G. Finardi, F. Berte and G. Bellomo (Pavia, Italy) 29–44

The in vivo oxidative metabolism of 2,4- and 2,6-dimethylaniline in the dog and rat (**Divergent pathways in metabolism are documented**)
by C.R. Short, M.L. Hardy and S.A. Barker (Baton Rouge, LA) 45–58

Metabolism of *N*-nitroso-hydroxyethyl-alkylamine phosphate esters in the rat (**These possibly biogenic conjugates of nitrosamines are rapidly degraded**)
by N. Frank, E. Frei and M. Wiessler (Heidelberg, FRG) 59–67

Bleomycin and cyclophosphamide toxicity in mice with damaged lung tissue (**Bleomycin and cyclophosphamide are more toxic in mice with damaged lungs**)
by J.P. Kehrer (Austin, TX) 69–82

Polychlorinated biphenyl (Aroclor 1254) induced changes in femur morphometry calcium metabolism and nephrotoxicity (**Aroclor 1254 is nephrotoxic and weakens femur structure**)
by J.E. Andrews (Research Triangle Park, NC) 83–96

Immunotoxicity of tributyltin oxide in rats exposed as adults or pre-weanlings (**The developing rat appears to be more sensitive to the immunosuppressive effects of TBTO than is the mature rat**)
by R.J. Smialowicz, M.M. Riddle, R.R. Rogers, R.W. Luebke and C.B. Copeland (Research Triangle Park, NC) 97–111

Contents of Journals relating to Toxicology 113–115

Review Paper

Comparative assessment of the toxicology of vitamin A and retinoids in man
by H.K. Biesalski (Mainz, FRG) 117–161

Research Papers

Thirteen-week toxicity study of n-hexane in B6C3F$_1$ mice after inhalation exposure (**Pathologic examination of nerves was a more sensitive index for the detection of neurotoxicity than were behavioural tests**)
by J.K. Dunnick, D.G. Graham, R.S.H. Yang, S.B. Haber and H.R. Brown (Durham and Research Triangle Park, NC) 163–172

Effects of the benomyl metabolite, carbendazim, on the hypothalamic-pituitary reproductive axis in the male rat (**Carbendazim produced elevation of serum FSH and LH, suggesting that supragonadal changes may be involved in carbendazim-induced fertility reduction**)
by J.M. Goldman, G.L. Rehnberg, R.I. Cooper, L.E. Gray, Jr., J.F. Hein and W.K. McElroy (Research Triangle Park, NC) 173–182

Interactions of manganese with human brain glutathione-*S*-transferase (**A possible role of 65T inhibition in the production of Parkinson symptoms by manganese is investigated**)
by A. Vescovi, M. Gebbia, G. Cappelletti, E.A. Parati and A. Santagostino (Milan, Italy) 183–191
Cephaloridine nephrotoxicity in streptozotocin induced diabetic Fischer 344 (F344) rats (**Nephrotoxicity is attenuated in rats with streptozotocin-induced diabetics**)
by M.A. Valentovic, J.G. Ball, C. Elliott and E. Madan (Huntington, WV) 193–207
Percutaneous toxicity of ethylene glycol monomethyl ether and of dipropylene glycol monomethyl ether in the rat (**After cutaneous absorption there are differences mainly in testicular toxicity between the two glycerols**)
by S. Fairhurst, R. Knight, T.C. Marrs, J.W. Scawin, M.S. Spurlock and D.W. Swantson (Wiltshire, UK) 209–215
Formation of nuclear anomalies in rat intestine by benzidine and its biliary metabolites (**Bile born benzidine metabolites may induce early stages of carcinogenicity in intestinal mucosa**)
by A.J. Percy, N. Moore and J.K. Chipman (Birmingham, UK) 217–223
Announcement 225
A review of the toxicity and carcinogenicity of anthraquinone derivatives
by L.E. Sendelbach (Worcester, MA) 227–240
Variability in soman toxicity in the rat: Correlation with biochemical and behavioral measures (**Inhibition of cholinesterase activity by soman in the thoracolumbar regions of the rat spinal cord gives best correlation with inhibition of cholinesterase activity in brain regions of a given animal**)
by V.R. Jimmerson, T.-M. Shih and R.B. Mailman (Chapel Hill, NC) 241–254
Biochemical responses of rat and mouse lung to inhaled nickel compounds (**Based upon equivalent concentrations of nickel in air, toxicity rating is $NiSO_4 > Ni_3S_2 > NiO$**)
by J.M. Benson, D.G. Burt, Y.S. Cheng, F.F. Hahn, P.J. Haley, R.F. Henderson, C.H. Hobbs, J.A. Pickrell and J.K. Dunnick (Albuquerque, NM and Research Triangle Park, NC) 255–266
Protective effect of flavonoids on drug-induced hepatotoxicity in vitro (**Flavonoids protect liver cells by preventing cell membrane damage**)
by J.C. Davila, A. Lenherr and D. Acosta (Austin, TX) 267–286
Perturbation of glutathione by a central action of morphine (**The following possibilities to explain the action of morphine have been excluded: decreased respiration, body temperature or cellular oxidation**)
by N.P. Skoulis, R.C. James, R.D. Harbison and S.M. Roberts (Little Rock, AR and Gainesville, FL) ... 287–302
Muscle necrosis by *N*-methylated *p*-phenylenediamines in rats: Structure-activity relationships and correlation with free-radical production in vitro (**There is indirect evidence that myotoxicity is related to free radicals**)
by R. Munday, E. Manns, E.A. Fowke and G.K. Hoggard (Hamilton, New Zealand) 303–314
Retention and distribution of manganese in the mouse brain following acute exposure on postnatal day 0, 7, 14 or 42: An autoradiographic and gamma counting study (**Kinetics of neonatal uptake and retention of manganese in mouse brain are described**)
by A.A. Valois and W.S. Webster (Sydney, Australia) 315–328
Preclinical evaluation of hematopoietic toxicity of antileukemic agent, 5-AZA-2′-deoxycytidine (**Given during a 12-h period (20 mg/kg in mice, 7 mg/kg in dogs), 5-Aza-CdR produces bone marrow toxicity within 7–16 days followed by recovery**)
by R.L. Momparler, F.A. Gonzales, L.F. Momparler and A. Ma (Quebec, Canada and Los Angles, CA) 329–336
Announcement 337
Contents of journals relating to Toxicology 339–342
